Objectifs

At the end of this lesson, learners will be able to

- *Identify LMS tools*
- *Identify the specific features of LMS tools*
- *Make appropriate choices of LMS tools*
- *Use phrasal verbs*
- *Use active and passive voice*

Introduction

This course addresses the issue of **Learning Management Systems (LMS)**, which is another critical topic related to **technopedagogy**. Around the world, educational institutions and companies use online platforms to facilitate the learning process through the various functionalities offered by these systems. An example is the **Moodle** platform used by the *Université Virtuelle de Côte d'Ivoire* for educational activities.

Learners of technopedagogy need to be aware of the range of LMS tools available and the key features of each so that they can make appropriate choices for their online training. This course provides not only knowledge about these issues but also the language skills learners need to communicate effectively about them.

PHRASAL VERBS

Phrasal verbs are commonly used in English, especially in informal conversations such as with family members, friends, and other relatives.

Because they are deeply rooted in everyday English, phrasal verbs play a crucial role in achieving a higher level of proficiency in the language.

They consist of a verb and a particle—or sometimes two particles—and the particle often changes the meaning of the original verb.

Examples :

a- I **called** Jen to see how she was. (*call* = to telephone)

b- They've **called off** the meeting. (*call off* = to cancel)

As far as word order is concerned, phrasal verbs fall into two categories : separable and inseparable.

Separable phrasal verbs : the verb and its particle are separated by other words as in the examples below :

a- I didn't want to **bring** the situation **up** at the meeting. (meaning of *bring up* : to start talking about a particular subject)

b- Please can you **fill** this form **in**? (meaning of *fill in* : to write information in a form or document)

c- E.g. I'll **pick** you **up** from the station at 8 p.m. (meaning of *pick up* : collect someone in a car or other vehicle to take them somewhere)

d- She **turned** the job **down** because she didn't want to move to Glasgow. (meaning of turn down : to not accept an offer)

Please note : when the verb object is a personal pronoun, it becomes mandatory to separate the verb and the particle.

E.g. They have **called** the meeting **off** or They have **called off** the meeting / BUT : They have **called it off** (it is incorrect to say they have called off it).

Non-separable phrasal verbs : in this case the verb and its particle cannot be separated by other words. Even with a personal pronoun, it is impossible to separate them.

Examples :

a- Who **looks after** the baby when you're at work?

b- Who **looks after** her when you're at work?

Other examples include :

c- I **came across** your email when I was clearing my inbox. (meaning of come across = to find something by chance)

d- The caterpillar **turned into** a beautiful butterfly. (meaning of turn into = become)

e- It was quite a major operation. It took months to **get over** it and feel normal again. (meaning of get over = recover from something)

f- We are aware of the problem and we are **looking into** it. (meaning of look into = investigate)

g- *Please note* : sometimes, it is impossible to separate the phrasal verb simply because it does not take an object.

Example : I **get up** at 7a.m

Phrasal verbs with two particles

Some phrasal verbs have two particles. These verbs are also inseparable even with a personal pronoun.

Examples :

a- Who **came up with** that idea? (meaning of come up with = think of an idea or plan)

b- Let's **get rid of** these old magazines to make more space. (meaning of get rid of = remove or become free of something that you don't want)

c- I didn't really **get on with** my stepbrother when I was a teenager. (meaning of get on with = like and be friendly towards someone)

d- Can you hear that noise all the time? I don't know how you **put up with** it. (meaning of put up with = tolerate something difficult or annoying)

e- The concert's on Friday. I'm really **looking forward to** it. (meaning of look forward to = be happy and excited about something that is going to happen)

ACTIVE AND PASSIVE VOICE

Defining Active and Passive Voice

There are two ways to present actions in a sentence. You can start your sentence with the subject performing the action, or you can start with the object that undergoes the action.

When the focus is on the subject, this is called the **active voice**.

When the focus is on the object, this is called the **passive voice**.

Examples : Technology revolutionizes teaching (active voice) / Teaching is revolutionized by technology.

How to Form Active and Passive Voice ?

The basic pattern of a sentence in the active voice can be schematized as follows :

SUBJECT + VERB + OBJECT

Example : The student uses a computer.

To turn the active voice into passive voice, you need to apply the following rule :

OBJECT + AUXILIARY BE + PAST PARTICIPLE FORM OF VERB + BY + SUBJECT

Note : the auxiliary BE should be put in the tense of the active sentence.

Example : A computer is used by the student

(OBJECT =A COMPUTER ; IS = AUXILIARY BE ; used = PAST PARTICIPLE OF VERB ; SUBJECT=The student)

Sometimes, you can form a passive sentence where the subject is not specified :

Example : The house was cleaned / The key was found / English is spoken all over the world

The passive voice can be formed **with modals** as in the table below :

ACTIVE VOICE	PASSIVE VOICE
The student may take the test.	The test may be taken by the student.
The student might take the test.	The test might be taken by the student.
The student can take the text.	The test can be taken by the student.
The student could take the test.	The test could be taken by the student.
The student shall take the test.	The test shall be taken by the student.
The student should take the test.	The test should be taken by the student.
The student will take the test.	The test will be taken by the student.
The student would take the test.	The test would be taken by the student.
The student must take the test.	The test must be taken by the student.

The passive voice is available for **all tenses** as summarized in the table below :

TENSE	ACTIVE VOICE	PASSIVE VOICE
PRESENT SIMPLE	Soundjata kills Soumangourou Kanté. Soundjata kills Soumangourou Kanté and his wife.	Soumangourou Kanté is killed by Soundjata. Soumangourou Kanté and his wife are killed by Soundjata.
PRESENT CONTINUOUS	Soundjata is killing Soumangourou Kanté. Soundjata is killing Soumangourou Kanté and his wife.	Soumangourou Kanté is being killed by Soundjata. Soumangourou Kanté and his wife are being killed by Soundjata.

FUTURE SIMPLE	Soundjata will kill Soumangourou Kanté. Soundjata will kill Soumangourou Kanté and his wife.	Soumangourou Kanté will be killed by Soundjata. Soumangourou Kanté and his wife will be killed by Soundjata.
PRESENT CONDITIONAL	Soundjata would kill Soumangourou Kanté. Soundjata would kill Soumangourou Kanté and his wife.	Soumangourou Kanté would be killed by Soundjata. Soumangourou Kanté and his wife would be killed by Soundjata.

OTHER CASES OF PASSIVE

1. In some cases, the passive is formed by combining the infinitive **to be** with a **past participle**:

Examples : *The doors are going **to be locked** at ten o'clock.*

*You shouldn't have done that. You ought **to be punished**.*

2. Sometimes, the pattern **get + past participle** is used to form the passive:

Examples : *Be careful with that glass. It might **get broken**.*

*Peter **got hurt** in a crash.*

3. In some sentences containing both a direct object and an indirect object, the **indirect object** can be used as the **subject** of the passive verb:

*Example : I gave **him** a book for his birthday (active voice) / **He** was given a book for his birthday (passive voice)*

*Someone sent **her** a cheque for a thousand euros (active voice) / **She** was sent a cheque for a thousand euros.*

4. We can use **phrasal verbs** in the passive:

Examples : *They **called off** the meeting (active voice) / The meeting was called off (passive voice)*

*His grandmother **looked after** him (active voice) / He was looked after (passive voice)*

*They **will send** him away to school. (active) / He will be sent away to school (passive voice)*

5. The passive voice is used in specific English phrases used in everyday speech :

- *be supposed to*
- *be expected to*
- *be asked to*
- *be told to*
- *be scheduled to*
- *be allowed to*
- *be invited to*
- *be ordered to*

Examples :

*John **has been asked** to make a speech at the meeting.*

You **are supposed to** wear a uniform.

The meeting **is scheduled to** start at seven.
